

Sentinel Countersunk Wood Screws

This is the original Nettlefolds one-way Pozidriv security system.

The Sentinel only operates in a clockwise motion using a standard Pozidriv tool (cross head screwdriver, with sharper point).

An anti-clockwise motion to remove the screw is simply not possible due to the rounded shape of the drive recess. The major benefit of the Sentinel over the Clutch Head screw is that it can be affixed quickly and easily with an electric screwdriver or drill, utilising a standard cross head pozidriv bit inserted.

To help you size up these screws or match against an existing screw, please see below for the dimensions of each screw type:
