

Kinmar Removable Security Nut

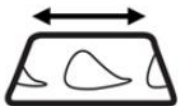

This ingenious Kinmar security nut is vastly superior to the more traditional shear nut alternative. This is because it has a far higher torque rating, meaning it can be tightened as hard as you like. Utilising SSP's much acclaimed removable Kinmar design, this two-way patented fixing can only be affixed with the corresponding socket. Once secured, it cannot be removed.

Another major benefit of this Kinmar is the driver socket is not widely available. Moreover, SecuritySafetyProducts will only sell the socket to customers who buy the security nuts at the same time or have bought the nuts previously from us. Manufactured from a choice of bright zinc plated steel, galvanised steel or A2 stainless steel, these security nuts are available in the following sizes:

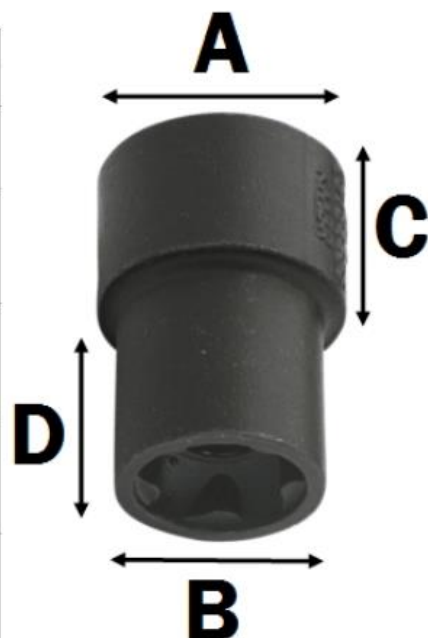

Size	M5	M6	M8	M10	M12
Length					
BZP Steel	x	x	x	x	x
Galvanised		x	x	x	x
A2 Stainless	x	x	x	x	x
Driver Size	KM6R	KM6R	KM8R	KM10R	KM12R

The dimensions of the removable Kinmar security nut are as follows:

	Screw Type	Size				
	Kinmar					
	Dimension	M5	M6	M8	M10	M12
A		12.1mm	12.1mm	16.1mm	20.1mm	24.2mm
B		5.8mm	5.8mm	7.3mm	9.2mm	10.6mm

Also detailed above is the socket that is used on each nut. The dimensions of this socket are shown below:

	Screw Type	Tool			
	Kinmar				
	Dimension	KM6R	KM8R	KM10R	KM12R
A		25.1	25.1	30	30
B		15.8	20.1	26.2	30
C		19.9	16.1	17.2	42mm Overall Length
D		16	19.9	24.8	

Specials

As well as sleeve anchors and nuts, we can offer our Kinmar screw in a range of made to measure specials, including:

- One way & two way machine bolts
- A2 stainless steel, Galvanised and BZP fixings

All styles possible, please give us a call to discuss.
