

Burton Safes are a leading supplier of domestic and commercial safes in the UK and Ireland. Our aim is to offer a high quality range of products that meet the demands of both the public and the insurance industry. We strive to back up the quality of our products with first class customer service.

Testing

Burton Safes believe in offering reliable and realistic cash ratings on their safes. As a result many of our safes are now independently attack tested to European standards, EN1143-1 & EN14450. This means that our customers can have peace of mind in the security of their safe.

Cash Ratings

These are an indication of the security level of a safe and the maximum level of money that should be stored inside it. A cash rating is what an underwriter will insure the contents of the safe for and can be multiplied by 10 times for jewellery. Therefore a £1000 cash rated safe would be suitable to store £10,000 worth of jewellery. The cash ratings given in this brochure are only a guide and assume correct installation. Insurance companies' ratings vary and higher or lower figures might be applied. If it is important always check with your insurance company before purchasing a safe.

Installation

Many safes are best installed by a professional locksmith or safe engineer. However, some of the smaller, domestic safes in this brochure are suitable for DIY fixing. If in doubt always consult your Burton Safes Stockist.

Warranty

Burton Safes branded products offer a 2 year warranty in respect of materials and workmanship. Keyguard Security branded products carry a one year warranty.*

Dimensions

Unless otherwise stated all dimensions are in millimetres and are in the order height x width x depth. All weights & dimensions are approximate. They are often rounded to the nearest 5mm or 5kg. E & OE.

*Warranty applicable to the lock is limited to that offered by the lock's manufacturer.
