

Tufnuts

The Tufnut security nut is a unique removable nut. Due to its angled shape, it is extremely difficult to grip to remove it unless you have another nut of the same size and a standard adjustable wrench/spanner as shown below.

To affix, screw the first Tufnut onto your bolt the right way up, then put another one on upside down. Insert an adjustable spanner or vice grips between the two Tufnuts and then turn both nuts to secure. Finally remove the second Tufnut leaving the first one secured and tamper resistant.

Tufnuts are made in bright zinc plated (CR-3) steel and are hardened to make it more resilient to attack. SSP's patented Tufnuts are available in the following sizes:

Style	Size	M6	M8	M10	M12
	Type 1 (Square)		X	X	X
Type 2 (Hex)					X

The dimensions of each Tufnut are as follows:

Style	Size	Type 1 M6	Type 1 M8	Type 1 M10	Type 2 M12
			7.4mm	7.4mm	7.4mm
		26mm	26mm	26mm	31mm
